

**Evolve leads the industry in environmentally responsible design.**

- As it relates to Healthcare Considerations:
  - **All Evolve Fabric Panels incorporate unique mineral wool fibre insulation** made from slag (steel byproduct) and basalt rock. Mineral wool fibre is a *totally inert, non-combustible* product, which *repels moisture and will not support mould and mildew.*
  - **Evolve's panel frames and storage components are made from epoxy powder coated metal.** Epoxy powder coating process involves no liquids and is solvent free. It contains *no harmful VOC's or lead.*
  - **Evolve panels are available with hard, washable surfaces on one or both sides.**

**Evolve is:**

- **GREENGUARD** Certified
- **ISO 14001: 2004** Registered
- **EcoLogo** Certified
