

4P's – Sustainable Design Loop

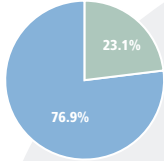

Total Recycled Content

Inform/Reform Glass Panel

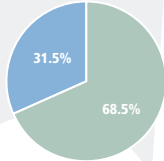

● Pre & Post-Consumer 11.22%
● New Material 88.78%

Inform/Reform Flush Panel

● Pre & Post-Consumer 23.1%
● New Material 76.9%

Interval Post & Beam

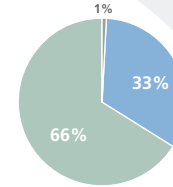

● Pre & Post-Consumer 68.5%
● New Material 31.5%

PROCUREMENT

- 100% recyclable steel
- Horizontal stiffeners made of recycled fibers
- Aluminum contains 70% recycled content
- Many fabrics are 100% recyclable

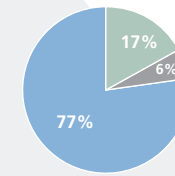

Breakdown of Products Materials

Inform/Reform Glass Panel

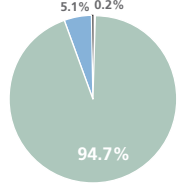

● Steel 33%
● Glass 66%
● Other 1%

Inform/Reform Flush Panel

● Steel 77%
● Fiberboard 6%
● Other 17%

Interval Post + Beam

● Steel 5.1%
● Aluminum 94.7%
● Plastic 0.2%

PROCESSING

- 85% of all waste is recycled
- Powder paint is reclaimed on-site
- Waste water is recycled off-site
- Certain textiles sent as technical & biological nutrients to other manufacturing processes

Inscape Architectural Interiors

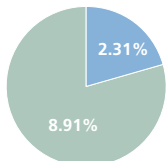

1. Inscape Architectural Interiors are manufactured on a reclaimed Brownfield site in Falconer, New York
2. The facility is in conformance with the Environmental Protection Agency standards
3. Reform is GREENGUARD listed for low-emitting products
4. Inscape Architectural Interiors are backed by our limited lifetime warranty

PRODUCTION

- No urea formaldehyde
- Powder paint emits negligible VOCs
- Adhesives emit negligible VOCs
- Water reuse saves 2 million gallons annually

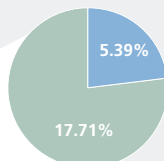

Post-Consumer Material

Inform/Reform Glass Panel

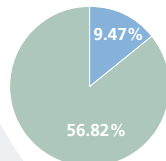

● Total Pre-Consumer 8.91%
● Total Post-Consumer 2.31%

Inform/Reform Flush Panel

● Total Pre-Consumer 17.71%
● Total Post-Consumer 5.39%

Interval Post + Beam

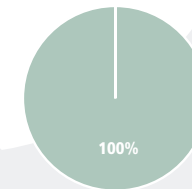

● Total Pre-Consumer 56.82%
● Total Post-Consumer 9.47%

PACKAGING

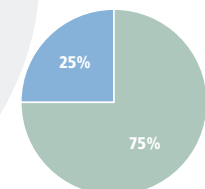

- Cardboard contains 100% post-consumer content
- Foam consists of 75% post-consumer content
- Honeycomb packaging is biodegradable
- Printing ink is water soluble

Recycled Content of Cardboard

● Pre-Consumer 0%
● Post-Consumer 100%

Recycled Content of Foam

● Pre-Consumer 25%
● Post-Consumer 75%
