Construction Waste Management: Divert 50% and 75% from disposal
Keilhauer packaging materials include boxes made from recycled cardboard and bags made from polypropylene, all of which can be recycled. Over 75% of all Keilhauer shipments are blanket wrapped, which eliminates virtually all packaging waste.

Regional Materials – 20% manufactured regionally
Keilhauer products may contribute to this point, depending on the project location. All Keilhauer products are manufactured in Toronto, Canada.

Keilhauer's Key Environmental Initiatives

- Use post-consumer recycled materials and sustainable raw materials in our products.
- Conduct annual waste audits of manufacturing facilities to continuously reduce waste and emissions in our processes.
- Recycle and reuse waste materials produced in our manufacturing processes.
- Use 100% green power sources in manufacturing and office facilities.
